

Attendance and Performance: Monthly Report

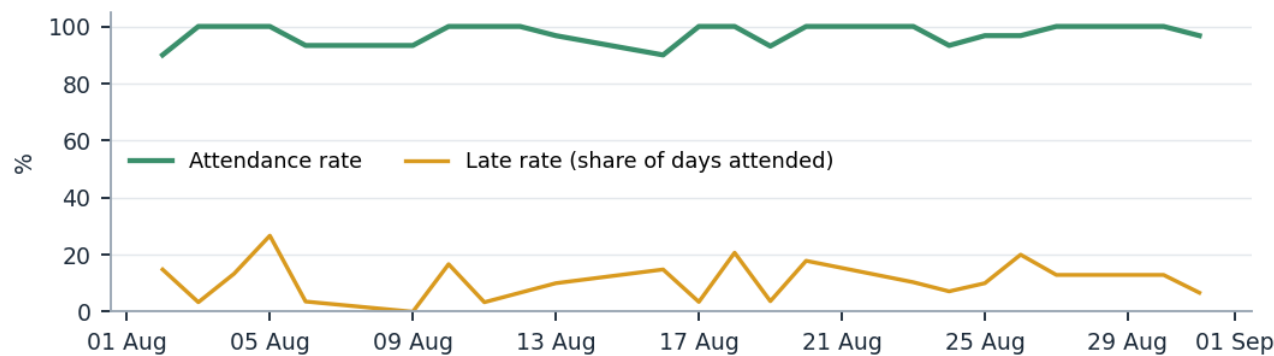

1 Aug 2026 to 31 Aug 2026 · Operations · Prepared 1 Oct 2026 14:10 · Calculation rules version 1.0

Made-up demonstration data. These figures show how the system works; they say nothing about any real organisation.

What is counted: Aug 2026, Operations. Each employee is counted only on the days they were employed. Scores below 3 are flagged for review.

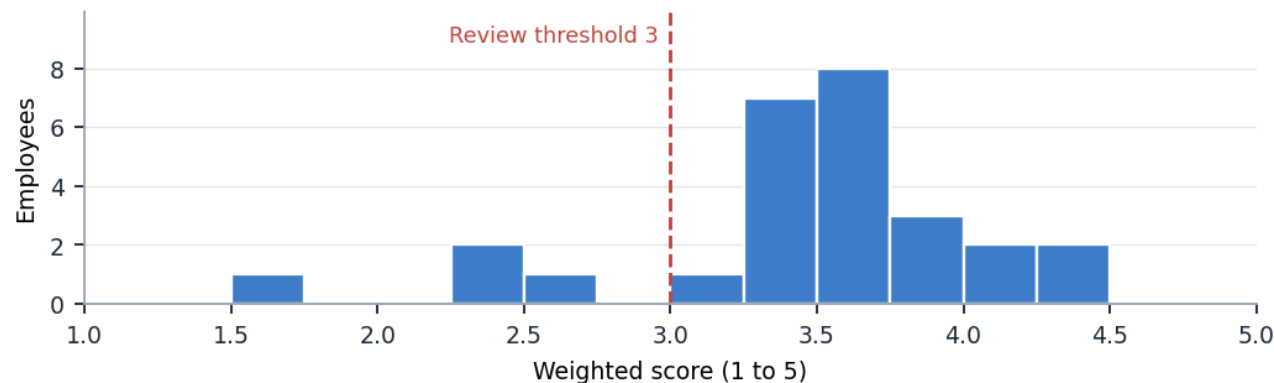

Attendance

Measure	Value	How it is worked out
Employees with attendance records	31	Everyone in scope who had at least one scheduled day
Attendance rate	97.3%	Days attended: 642 of 660 working days
Absence rate	2.7%	Days absent without approved leave: 18
Late rate	10.9%	Days late: 70, out of 642 days attended
Average lateness	37.5 min	Minutes after the shift start, on late days only
Missing punches	1.2%	Days with only one punch: 8
Left early	17	Days the last punch came before the shift end, allowing for the grace period
Average hours present	8.23 h	First to last punch on full days; this is not confirmed working time
Leave and public holidays	29 / 0	Days on approved leave / public holidays; not counted in the rates

Performance

Measure	Value	How it is worked out
Evaluations saved	27	Employees who could be evaluated this month: 31
Evaluation coverage	87.1%	Counts employees who worked at least 10 days in the month
Average weighted score	3.43	On a scale of 1 to 5, using the weights in force when each evaluation was saved
Below the review threshold	4 (14.8%)	Weighted score below 3

Employees worth a conversation

These flags come from simple rules anyone can check, not from a prediction. They point to where a supportive conversation may help and must never be used on their own for a decision about a person.

What was noticed	Employees
Frequent absences: Three or more unexcused absences in the month	1
Low performance score: Weighted performance score below the review threshold	4
Sharp drop in score: Weighted score fell by 1.0 or more compared with the previous month	1

Employee	Department	What was noticed	The numbers
E0011 · Yousef Al-Omari	Operations	Low performance score	Score 2.45 (review below 3.00)
E0015 · Rakan Al-Juhani	Operations	Frequent absences	3 unexcused absences
E0015 · Rakan Al-Juhani	Operations	Low performance score	Score 1.65 (review below 3.00)
E0015 · Rakan Al-Juhani	Operations	Sharp drop in score	Fell from 2.70 to 1.65
E0018 · Khalid Al-Qahtani	Operations	Low performance score	Score 2.65 (review below 3.00)
E0118 · Rakan Al-Subaie	Operations	Low performance score	Score 2.40 (review below 3.00)

Data quality

Check	Result
Punch files imported for this month	1
Rows set aside during import	3 unknown badges, 2 unreadable times, 1 missing badge number, 1 time in the future
Punches that did not match a working day	None
Days with a missing punch	8
Days whose shift had not finished when last calculated	0
Work on days off or public holidays (not counted in the rates)	7
Employees still waiting for an evaluation	4

Definitions

Term	Meaning
Working day	A scheduled working day while the person is employed, not on approved leave or a public holiday, and whose shift has ended.
Attended	At least one punch on that day.
Late	The first punch came after the shift start plus the grace period. A punch exactly at the end of the grace period is on time.
Absent	A working day with no punch at all. This is decided only after the shift has ended.
Missing punch	Only one punch that day, so either the clock-in or the clock-out is missing.
Hours present	Time from the first to the last punch. Breaks and unrecorded exits are unknown, so this is not confirmed working time.
Night shift	Counted on the date it starts.
Weighted score	Each category score (1 to 5) multiplied by its weight, added up and divided by 100.
